

LIVER DISEASES

The center has its expertise in the diagnosis and treatment of liver disease. Comprehensive hepatology services include diagnosis and management of viral, autoimmune and metabolic liver diseases, hepatitis B and C, hepatocellular carcinoma and primary biliary cirrhosis.

We provide a wide range of care utilizing state-of-the-art therapies and techniques such as :

- Antiviral therapy for patients with chronic viral hepatitis
- Immunization against viral hepatitis
- Nutrition counseling
- Liver Biopsy
- Liver Abscess pigtail catheter drainage
- Variceal obliterative therapy (sclerotherapy, banding)
- Surgical portosystemic shunts
- Evaluation for liver transplantation

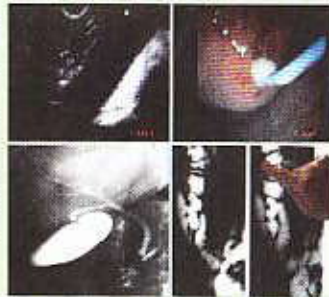

PEDIATRIC GASTROENTEROLOGY

We provide the most advanced care for children :

- ♦ Recurrent abdominal pain ♦ constipation ♦ chronic diarrhea
- ♦ gastroesophageal reflux ♦ celiac disease
- ♦ eosinophilic esophagitis ♦ food allergies ♦ viral hepatitis
- ♦ chronic liver disease ♦ pancreatitis ♦ jaundice ♦ gallstones
- ♦ nonalcoholic fatty liver disease ♦ Hirschsprung's disease
- ♦ Hypercholesterolemia ♦ Crohn's disease and ulcerative colitis
- ♦ obesity ♦ malnutrition and failure to grow and gain weight.

Our Center provide all necessary procedures to be carried out safely and conveniently.

TESTING AND TREATMENT INCLUDE:

- ERCP (endoscopic retrograde cholangiopancreatography), which allows the physician to visualize the biliary and pancreatic ducts where immediate diagnosis and treatment can take place.

- Endoscopic ultrasound (EUS), which uses sound waves to produce images of the pancreas and surrounding areas, is more effective than a CT scan in diagnosing and staging cancer. It is also used in screening for pancreatic lesions and cancer in high risk groups.
- EUS-guided fine-needle aspiration of pancreatic cysts and tumors and EUS-guided celiac block for chronic abdominal pain.
- Balloon dilation and stenting of post liver transplantation biliary strictures
- Specialized radiological imaging for examining the pancreas, including Helical/Multi-detector CT and MRCP
- Placement of enteral metal stents for palliation of obstructions due to cancer to improve the patient's quality of life.

INFLAMMATORY BOWEL DISEASE

At the GK Digestive Disease & Endoscopy Center, we utilize state-of-the-art diagnostics and therapies in the management of inflammatory bowel disease (IBD), particularly Crohn's disease and ulcerative colitis (UC). Despite decades of research, the causes of ulcerative colitis and Crohn's disease remain obscure. Although there's no known cure, treatment may dramatically reduce the symptoms and bring about remission. Both standard and experimental drug therapies are available.

Dr. Kailash Mishra

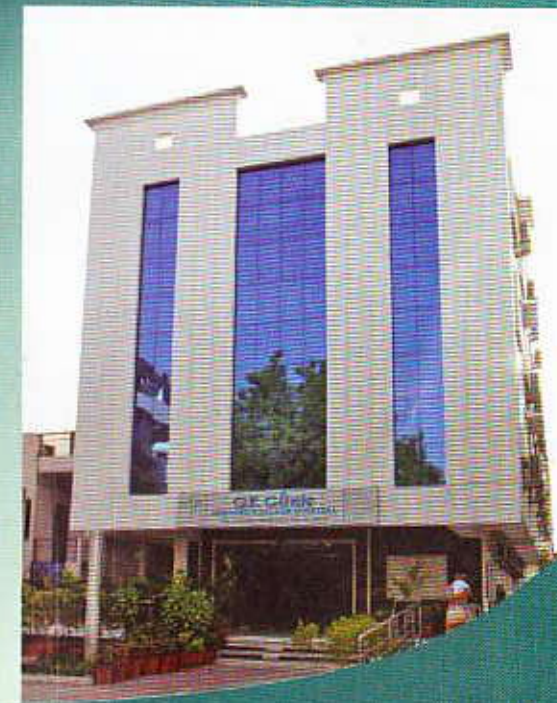

M.D., D.M. (Gastro)

Consulting Gastroenterologist & Endoscopist

GK Clinics, 1st Floor,
11/A, Old Palasia, Indore

GK Digestive diseases and Endoscopy Center

is a tertiary care center to bring comprehensive care in the field of basic and advanced gastroenterology where knowledge and technology go hand in hand. This is need of the hour as despite being the commercial capital of our state we lacked a well equipped facility in providing quality care for digestive diseases in a comprehensive manner. Our facility is started with this vision where we aim to offer complete services for evaluating gastrointestinal disorders, Pancreatico-biliary diseases, Gastrointestinal cancer management, ano-rectal and colonic problems and liver disease. Our fully-equipped endoscopy unit provides advanced diagnostic and therapeutic techniques such as EUS and ERCP procedures. We also have well-established services in interventional radiology, pediatric gastroenterology, and Gloncology.

GK Digestive Disease & Endoscopy Center coordinate all aspects of patient testing and treatment in one convenient location, and maintain communication with referring physicians providing a seamless continuum of care.

Nearly 250 million Indians suffer from digestive disorders such as gastroesophageal reflux

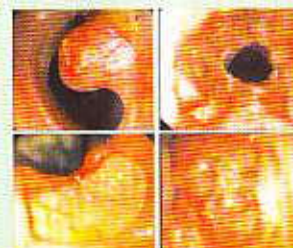

disease (GERD), ulcers, gastritis, pancreatic and gall bladder disease, esophageal and colon cancers, acute and chronic liver disease—debilitating conditions that can profoundly affect both the health and overall quality of life of those afflicted.

Patients requiring consultation and treatment for complex issues or advanced therapeutic endoscopy will find that the GK Digestive Diseases & Endoscopy Center offers the best care in the city of Indore

GENERAL GASTROENTEROLOGY

In addition to routine colorectal screenings, we provide diagnoses and treatment for a wide range of medical problems related to the stomach, intestinal tract, biliary tract, gallbladder, bowel and liver, including:

- Colon polyps and colon cancer
- Constipation
- GI bleeding
- Hemorrhoids
- Irritable bowel syndrome
- Chronic diarrheal disorder
- Peptic ulcer disease
- Rectal incontinence
- Dysphagia (Swallowing Disorders)
- Anemia and occult bleeding
- Diverticular disease.

ADVANCED ENDOSCOPY

The enormous medical breakthrough of endoscopy allows for direct internal examination and much more accurate diagnosis and treatment of digestive and liver problems, without invasive surgical procedures.

Our highly trained Gastroenterologist is at the forefront in the use and development of innovative treatments and leading edge technology.

These are the highlights of advanced endoscopy

- Endoscopic retrograde cholangiopancreatography (ERCP)
- Endoscopic ultrasound with fine-needle aspiration (EUS FNA)
- Colonic stents, esophageal stents, small bowel stents and other stent placement for palliative purposes
- Routine colonoscopy screening and treatment of small tumors and polyps Esophageal dilation
- Advanced radiological imaging, such as MRI, MRCP, EUS, CECT scans, provide detailed information to increase diagnostic accuracy
- Remicade (Infliximab) infusion therapy
- Percutaneous Endoscopic Gastrostomy (PEG) placement
- Endoscopic hemostasis (Sclerotherapy, Variceal ligation, hemoclip, Heat coagulation)
- Screening for Barrett's Esophagus for those suffering from chronic reflux disease Barrett's esophagus is a precancerous condition associated with GERD. Procedures such as EUS may diagnose these early esophageal diseases.

COMPREHENSIVE GI SERVICES

The GK Digestive Disease Center at GK Clinic, Greater Kailash Hospital provides expertise in all aspects of gastrointestinal disease management, including:

- ◆ GENERAL GASTROENTEROLOGY
- ◆ PANCREATICOBILIARY DISEASE
- ◆ INFLAMMATORY BOWEL DISEASE
- ◆ PEDIATRIC GASTROENTEROLOGY
- ◆ GASTROINTESTINAL RADIOLOGY
- ◆ GASTROINTESTINAL ONCOLOGY
- ◆ ADVANCED ENDOSCOPY
- ◆ ESOPHAGEAL DISORDERS
- ◆ LIVER DISEASES
- ◆ PATHOLOGY
- ◆ NUTRITION

GK DIGESTIVE DISEASES & ENDOSCOPY CENTER: ACADEMIC AMBITIONS

We aim for the excellence and innovation involving clinical knowledge, skills and advanced technology. We look forward to develop the center as an excellent academic center in digestive sciences and to spread the up to date knowledge.

MULTI-DISCIPLINARY APPROACH

As the Center has all the specialities at one location we have strong collaboration with other Departments i.e. Radiology, Gastrointestinal Surgery, pathology etc to establish multidisciplinary approach. Our weekly inter-departmental meet discuss the complex issues and management so as to provide the best of the care.

BRAND NEW ENDOSCOPY CENTER

The GK Digestive Diseases & Endoscopy Center is located in Old Palasia, The heart of the city of Indore. The center is very well equipped with modern endoscopic facilities.

At our state-of-the-art Endoscopy Center, patients have access to investigational and treatment option.

PANCREATICOBILIARY DISEASE

The Pancreaticobiliary Center is dedicated to the comprehensive assessment and treatment:

Acute and chronic pancreatitis, pancreatic cancer, bile duct cancers and other disorders of the biliary tract and pancreas. Coordinated patient care, with physicians from a variety of disciplines, means comprehensive care is received in one central location. Doctors work together to develop a unified, individualized treatment plan.
